

About Homecrop

Homecrop offers a sustainable and healthy way of growing fresh, toxin-free vegetables in urban spaces.

We have overcome lack of space by introducing modular urban farms that can easily be installed on rooftops, balconies and other unused areas.

FARM-GROWN AT HOME

Cities Are The New Farms

GROW FRESH, TOXIN-FREE VEGETABLES AT HOME

www.homecrop.in

Highlights

- Vacant space to vibrant edible farm with a motto of Produce Fresh & Eat Fresh.
- No damage to the roof or floor! All structures are designed to be above the ground level.
- Completely modular! Easy to assemble and dissemble if you are moving houses.
- Minimal effort required to maintain the kit.

- Shelf life of the product is minimum of 7 years.
- In-house prepared proprietary Growing Media! Highly nutritious and water efficient; 60-70% reduction in water usage.
- Going away for a week? Don't worry at all! Our water saving mechanism takes care of the water requirement while you are away.
- Free remote support via Whatsapp, email and phone to help you grow your own veggies without any prior experience.
